                          Tarun Tejas M

*The idea of our Custom resume generator is to help students to get their resume in hand just by filling up a simple form where important credentials need to be filled. *The resume is downloadable in PDF format. Also, the user can log in again to access the previous resume that he/she has made *The resume is of Standard Format as stated by most of the Engineering

1. OVERVIEW and Details

Making Resume is a very hectic work for all the students. And any update to be made is also difficult. Every time the job seeker has to attach his resume while applying for the job. If any changes/ Updation of new things learned can not be done after the resume is submitted.Custom Resume / Web Profile Maker is the Web Application which helps students to get their resume in hand just by filling up a simple form where important credentials need to be filled.After you fill all the forms we will provide you with the personalised URL, Which they can share with the employers. One can also download the Profile as a pdf.

2.About

For a long time, building a resume has been one hell of a job, the process of combining all the data that's required to be put up on the resume and deciding the right design to go has become a nightmare for a lot of youngsters who wish to get things done in no/very less time, and have no patience to wait in order to attain perfection in building/achieving whatever they desire to, by Introducing a custom resume builder that targets the kind of crowd that is mentioned above, we wish to provide a neat and clean resume specifically targeting the generation that thrives simplicity and elegance

Abstract

When a job seeker wants to apply for a job online then generally he /she needs to attach his /her resume with the email.

Online Web profile / Custom Resume creator is a better way to show their resumes to the employers. A job seeker does not need to attach a resume with every email, he/she just have to include the URL of his/her resume and the employer can view the resume online by clicking on the link and can download as well

Introduction

Custom Resume / Web Profile Maker is the Web Application which helps students to get their resume in hand just by filling up a simple form where important credentials need to be filled.

After you fill all the forms we will provide you with the persanalised URL, Which they can share with the employers. One can also download the Profile as a pdf.

Any updation in the resume is easy to make.
